Dekker/Perich/Sabatini

Dekker/Perich/Sabatini (DPS) is a Nevada architectural firm with specializations in higher education, high technology and health care projects. The firm, established in Las Vegas in 1988, has provided comprehensive architectural, interior design and engineering services to many of the state's leading institutions, including the University of Nevada, Reno, University of Nevada Las Vegas, and Western Nevada Community College among others.

Dekker/Perich/Sabatini is a full-service architectural and engineering firm providing architecture, planning, interior design, structural engineering and landscape architecture. DPS is an honored and recognized leader in the industry and region having received more than 90 awards for design excellence. The firm has more than 200 employees in Nevada, New Mexico and Texas. Our Las Vegas office has 30 full-time employees specializing in state and local public works projects, LEED sustainable design consulting, commercial, education, and health care markets.

With a strong, client-focused commitment, the firm utilizes a multi-disciplined, rational problem-solving approach. The fundamental focus of our approach is, "A Search for Design Excellence." It is this commitment and approach that Dekker/Perich/Sabatini brings to the University of Nevada School of Medicine Center for Molecular Medicine.

We are honored to be part of the team on this exciting project for the University of Nevada, Reno and the citizens of Nevada.
