Administrative Advisors

Jennifer Kimmel, M.D.	Pennington 217A (0342)
Associate Dean	Reno, NV 89557
Office of Medical Education	(775) 682-7727

If a student is unable to make a tentative decision about a field of interest, Dr. Kimmel will act as a career advisor. In addition, other full-time faculty may be approved as career advisors. Contact Dr. Kimmel for this option.

Our career advisors have several roles. They meet with students to review and make recommendations for the Year IV schedule. They have information where former students have taken electives and residencies and they are knowledgeable about contacts in Reno who have professional contact with individuals in other programs. Finally, career advisors act as spokespersons in helping students obtain a residency position, if students have difficulties obtaining one in the Match.
